Sol Jin

781-408-9944 | sol.jin501@gmail.com | github: jin501 | wordpress: solcodes

TECHNICAL PROJECTS

Bucket - *Create bucket lists, track your goals and share your experience*
+ Mimicked Instagram's 'follow' capability by implementing a self-referential association model
+ Developed custom server-side authorization in Ruby and custom client-side validations in JavaScript
+ Styled using JavaScript, HTML/CSS and Semantic UI framework to create a mobile-first application

myCloset- *A wardrobe management web app with an added e-commerce element*
+ Secured application and data access by implementing authorization and third-party authentication with Devise and OmniAuth respectively
+ Designed a RESTful API and used Ajax requests to retrieve serialized data in JSON format
+ Utilized relational database modeling and ActiveRecord to manage Controller-Database interactions (queries, updates and deletions)

JAMS - *Job Application Management System*
+ CUNY Accelerator & Google Developer Group Hackathon Winner, built with React and Firebase

Additional Projects: http://www.sol-jin.herokuapp.com
